Nationality: Syrian **Date of birth:** 09/01/1999 **Gender:** Male  **Phone number:** (+963) 945238961

 **Home:** 7 April Street, Latakia (Syria)

ABOUT ME

A fresh graduate from Tishreen University, earned a Bachelor's degree in Informatics Engineering with a graduation average of 80.86%. Very excited about the opportunity to work full-time as a web developer for your company. I am confident that I can make valuable contributions to your team. I will be committed to producing high-quality work and collaborating effectively with my colleagues. Last month, I started studying for a master's degree in Web Science at Syrian Virtual University (SVU).

Tishreen University [2017 – 2022]

Address: 0000 Latakia (Syria)

SKILLS

Knowledge of the most important skills necessary for a React Developer.

1. Experience in working with HTML, CSS, JavaScript, Bootstrap and related frameworks and libraries
2. Familiarity with best practices for using Redux and Context, such as organizing reducers and actions, and avoiding unnecessary re-renders
3. Create responsive user interfaces using React js and next js.
4. Knowledge of database technologies like MySQL
5. Familiar with Github
6. experience in working with external APIs.

PROJECTS

Projects I gain experience through

1. full stack e commerce [Link](#)

- Created a responsive user interface using React components, including product pages, shopping cart, and checkout process, etc.
- dealt with cloud-based database which is Firebase.
- Integrated Firebase authentication and authorization for user registration and login
- Implemented a complex state management system using Redux, including product data, customer information, and order details.
- Built a dashboard which contributing to manage the entire website more easily

2. multi step form [Link](#)

- Designed and developed the multi-step form using React JS, including input fields, form validation, and progress indicators.
- Implemented a state management system using React's Context API to manage the form data and user input across multiple steps.

3. movies app [Link](#)

- Integrated a movie API into the website using JavaScript to fetch movie data and display it on the page.
- Implemented Redux for state management

4. e commerce product page [Link](#)

- A responsible website page which shows one product in an e-commerce website.
- Developed using HTML, CSS, bootstrap and JavaScript.

5. manage landing page [link](#)

6. interactive card details form main page [Link](#)

7. agency homepage [Link](#)

8. news homepage [Link](#)

9. results summary component [Link](#)
